TruNova Launchpad – Advanced Inventory Package

A structured, predictable way to support advanced inventory requirements such as multiple locations, bins, and tracking in Dynamics 365 Business Central.

What This Package Is

The Advanced Inventory Package extends the Consultant-Led TruNova Launchpad Base Package and Core Inventory Package to support more complex inventory operations in Dynamics 365 Business Central.

This add-on is delivered by TruNorth Dynamics as a fixed-price, fixed-scope, and fixed-timeframe engagement. It is designed for organizations that require enhanced inventory control while maintaining a clean, scalable Business Central environment.

How the Advanced Inventory Package Works

With the Advanced Inventory Package, TruNorth Dynamics guides the implementation using the same structured, productized delivery model as the Base Package.

The Advanced Inventory Package follows this flow:

1. **Kickoff & Inventory Complexity Process Alignment**
   Confirm advanced inventory requirements including locations, bins, tracking methods, and operational constraints within the defined scope.
2. **Guided Configuration**
   TruNorth consultants configure inventory setups and advanced inventory features using standard Business Central functionality and Launchpad best practices.
3. **Data Import Governance**
   TruNorth Dynamics prepares import templates for item master data and inventory opening balances. The client imports and reviews the imported data at defined checkpoints with TruNorth guidance.
4. **Client Testing**
   The client validates inventory transactions, valuation, and financial posting with TruNorth guidance.
5. **Go-Live Readiness**
   Final review of inventory workflows and readiness to operate inventory in Business Central.

This approach ensures controlled delivery of advanced inventory capabilities without introducing unnecessary customization or risk.

Estimated Timeline

Approximately 2 additional weeks beyond the Base Package, assuming timely client participation and access. This is a fixed-timeline add-on. Client-caused delays may require a change order to extend the implementation timeframe.

What's Included

As part of the Advanced Inventory Package, TruNorth Dynamics provides:

- Inventory setup and configuration
- Finance and inventory integration
- On-hand inventory visibility
- Item pricing configuration
- Item categories and attributes
- Costing method configuration
- Multiple units of measure
- Multiple inventory locations
- Bin setup and management
- Drop shipment configuration
- Serial number and/or lot number tracking
- Item variants
- Item reservations
- Inventory beginning balance import

What's Not Included

The following items are not included in the Advanced Inventory Package:

- Advanced warehousing functionality
- Directed pick and put-away strategies beyond standard setup
- Manufacturing or production functionality
- Historical inventory transactions
- Custom inventory logic or workflows
- Custom reports or dashboards
- Third-party inventory or warehouse integrations
- Any functionality or activity not explicitly listed as included

Required to Use This Package

The following are required to purchase and use the Advanced Inventory Package:

- TruNova Launchpad Base Package
- Active Launchpad subscription (Consultant-Led tier)
- Active Success Plan

Optional Add-Ons

- Role-based training packages
- Additional functional add-ons
- DataCapsule ($99/month)
- Success Plan upgrades

Scope Clarity (Important)

TruNova Launchpad is intentionally productized to ensure predictable pricing and delivery. If a feature, task, service, or activity is not explicitly listed as included in this document, it is not part of this engagement. Additional services may be added outside of the fixed-scope project through separate add-ons or agreements.
