TruNova Launchpad – Assembly Package

A structured, predictable way to support assemble-to-order and assemble-to-stock scenarios in Dynamics 365 Business Central.

What This Package Is

The Assembly Package extends the Consultant-Led TruNova Launchpad Base Package and applicable inventory add-ons to support standard assembly functionality in Dynamics 365 Business Central.

This add-on is delivered by TruNorth Dynamics as a fixed-price, fixed-scope, and fixed-timeframe engagement. It is designed for organizations that need light manufacturing-style assembly without the complexity of full production or manufacturing modules.

How the Assembly Package Works

TruNorth Dynamics guides the implementation using the same structured, productized delivery model as the Base Package.

The Assembly Package follows this flow:

1. **Kickoff & Assembly Process Alignment**
   Confirm assembly requirements, bill of materials structure, and whether items will be assembled to order or to stock, within the defined scope.
2. **Guided Configuration**
   TruNorth consultants configure assembly functionality using standard Business Central features and Launchpad best practices.
3. **Data & Setup Governance**
   TruNorth Dynamics prepares import templates for Assembly Bills of Materials (BOMs). The client imports and reviews the imported data at defined checkpoints with TruNorth guidance.
4. **Client Testing**
   The client validates assembly transactions, component consumption, output, and financial posting with TruNorth guidance.
5. **Go-Live Readiness**
   Final review of assembly workflows and readiness to operate assembly processes in Business Central.

This approach ensures predictable delivery of assembly capabilities without introducing manufacturing complexity or customization risk.

Estimated Timeline

Approximately 1 additional week beyond the Base Package, assuming timely client participation and access. This is a fixed-timeline add-on. Client-caused delays may require a change order to extend the implementation timeframe.

What's Included

As part of the Assembly Package, TruNorth Dynamics provides:

- Assembly setup and configuration
- Assembly Bill of Materials (BOM) setup
- Assembly BOM import
- Assemble-to-order configuration
- Assemble-to-stock configuration
- Integration with inventory and financial posting

What's Not Included

The following items are not included in the Assembly Package:

- Manufacturing or production orders
- Routing, capacity, or shop floor control
- Advanced manufacturing planning
- Historical assembly transactions
- Custom assembly logic or workflows
- Custom reports or dashboards
- Third-party manufacturing or MES systems
- Any functionality or activity not explicitly listed as included

Required to Use This Package

The following are required to purchase and use the Consultant-Led Launchpad:

- TruNova Launchpad Base Package
- Inventory Core Add-On or Inventory Advanced Add-On
- Active Launchpad subscription (Consultant-Led tier)
- Active Success Plan

Optional Add-Ons

- Role-based training packages
- Additional functional add-ons
- DataCapsule ($99/month)
- Success Plan upgrades

Scope Clarity

TruNova Launchpad is intentionally productized to ensure predictable pricing and delivery. If a feature, task, service, or activity is not explicitly listed as included in this document, it is not part of this engagement. Additional services may be added outside of the fixed-scope project through separate add-ons or agreements.
