# TruNova Launchpad – Core Inventory Package

A structured, predictable way to establish foundational inventory visibility and costing in Dynamics 365 Business Central.

## What This Package Is

The Core Inventory Package extends the TruNova Launchpad Base Package to support standard inventory setup and inventory-financial integration in Dynamics 365 Business Central.

This add-on is delivered by TruNorth Dynamics as a fixed-price, fixed-scope, and fixed-timeframe engagement. It builds on the financial foundation established in the Base Package and enables organizations to manage on-hand inventory, item setup, and basic costing using standard Business Central functionality.

## How the Core Inventory Package Works

TruNorth Dynamics guides the implementation using the same structured, productized delivery model as the Base Package.

The Core Inventory Package follows this flow:
1. **Kickoff & Purchase Process Alignment**
   Confirm inventory structure, costing method, item categorization, and financial integration within the defined scope.
2. **Guided Configuration**
   TruNorth consultants configure inventory setup and finance integration using standard Business Central features and Launchpad best practices.
3. **Data Import Governance**
   TruNorth Dynamics prepares import templates for item master data and inventory opening balances. The client imports and reviews the imported data at defined checkpoints with TruNorth guidance.
4. **Client Testing**
   The client validates inventory transactions, valuation, and financial posting with TruNorth guidance.
5. **Go-Live Readiness**
   Final review of inventory workflows and readiness to operate inventory in Business Central.

This approach ensures predictable delivery, controlled scope, and smooth adoption of purchasing processes without unexpected costs.

## Estimated Timeline

Approximately 1 additional week beyond the Base Package, assuming timely client participation and access. This is a fixed-timeline add-on. Client-caused delays may require a change order to extend the implementation timeframe.

## What's Included

As part of the Core Inventory Package, TruNorth Dynamics provides:

- Inventory setup and configuration
- Finance and inventory integration
- On-hand inventory visibility
- Item pricing configuration
- Item categories and attributes
- Costing method configuration
- Inventory beginning balance import

## What's Not Included

The following items are not included in the Core Inventory Package:

- Serial number or lot number tracking
- Multiple locations, bins, or warehouse complexity
- Item variants
- Advanced warehousing functionality
- Historical inventory transactions
- Custom inventory logic or workflows
- Custom reports or dashboards
- Third-party inventory or warehouse integrations
- Any functionality or activity not explicitly listed as included

## Required to Use This Package

The following are required to purchase and use the Core Inventory Package:

- TruNova Launchpad Base Package
- Active Launchpad subscription (Consultant-Led tier)
- Active Success Plan

## Optional Add-Ons

- Role-based training packages
- Additional functional add-ons
- DataCapsule ($99/month)
- Success Plan upgrades

## Scope Clarity (Important)

TruNova Launchpad is intentionally productized to ensure predictable pricing and delivery.  If a feature, task, service, or activity is not explicitly listed as included in this document, it is not part of this engagement. Additional services may be added outside of the fixed-scope project through separate add-ons or agreements.
