TruNova Launchpad – Warehousing Package

A structured, predictable way to support advanced inventory requirements such as multiple locations, bins, and tracking in Dynamics 365 Business Central.

What This Package Is

The Warehousing Package extends the Consultant-Led TruNova Launchpad Base Package and applicable inventory add-ons to support standard warehouse operations in Dynamics 365 Business Central.

This add-on is delivered by TruNorth Dynamics as a fixed-price, fixed-scope, and fixed-timeframe engagement. It is designed for organizations that require controlled warehouse processes while maintaining simplicity, scalability, and alignment with standard Business Central functionality.

How the Warehousing Package Works

TruNorth Dynamics guides the implementation using the same structured, productized delivery model as the Base Package.

The Warehousing Package follows this flow:

1. **Kickoff & Warehouse Process Alignment**
   Confirm warehouse structure, picking and receiving workflows, and operational requirements within the defined scope.
2. **Guided Configuration**
   TruNorth consultants configure warehousing functionality using standard Business Central features and Launchpad best practices.
3. **Data Import Governance**
   Warehouse locations and related setup are configured and reviewed at defined checkpoints with TruNorth guidance.
4. **Client Testing**
   The client validates warehouse transactions, picks, put-aways, and posting behavior with TruNorth guidance.
5. **Go-Live Readiness**
   Final review of warehouse workflows and readiness to operate warehouse processes in Business Central.

This approach ensures predictable delivery of warehouse functionality without introducing unnecessary complexity or customization.

Estimated Timeline

Approximately 1 additional week beyond Inventory Core or Inventory Advanced, assuming timely client participation and access. This is a fixed-timeline add-on. Client-caused delays may require a change order to extend the implementation timeframe.

What's Included

As part of the Warehousing Package, TruNorth Dynamics provides:

- Warehouse setup and configuration
- Inventory picks
- Inventory put-aways
- Multiple order processing for warehouse shipments and receipts

What's Not Included

The following items are not included in the Warehousing Package:

- Advanced warehouse automation
- Directed pick and put-away strategies beyond standard setup
- Complex warehouse routing or zone management
- Custom warehouse workflows or logic
- Manufacturing or production warehouse functionality
- Historical warehouse transaction imports
- Custom reports or dashboards
- Third-party warehouse management systems (WMS)
- Any functionality or activity not explicitly listed as included

Required to Use This Package

The following are required to purchase and use the Warehousing Package:

- TruNova Launchpad Base Package

- Inventory Core Add-On or Inventory Advanced Add-On

- Active Launchpad subscription (Consultant-Led tier)

- Active Success Plan

Optional Add-Ons

- Role-based training packages

- Additional functional add-ons

- DataCapsule ($99/month)

- Success Plan upgrades

Scope Clarity (Important)

TruNova Launchpad is intentionally productized to ensure predictable pricing and delivery. If a feature, task, service, or activity is not explicitly listed as included in this document, it is not part of this engagement. Additional services may be added outside of the fixed-scope project through separate add-ons or agreements.
