

Business Central Assembly – Pro Training

Course Description

This course provides participants with a practical, end-to-end understanding of Assembly Management in Microsoft Dynamics 365 Business Central. Participants will learn how to work with assembly BOMs, assemble items for sales orders and storage, and manage assemble-to-order and assemble-to-stock flows. The course includes guided walkthroughs and real-world scenarios focused on kitting and light manufacturing, and it highlights key setup considerations such as locations, bins, and posting behavior.

This course is best suited for teams that need to bundle components into finished goods without the complexity of full production orders and routings.

Learning Objectives:

- Create and maintain assembly BOMs and understand how BOM component lines drive assembly orders.
- Configure assembly item settings to support assemble-to-order and assemble-to-stock processes.
- Assemble items for sales orders and for inventory stock using assembly orders.
- Quote and sell assemble-to-order items, including partial fulfillment and mixed inventory/assembly supply scenarios.

Additional Details:

Format: Virtual delivery with up to 5 users and a provided recording.

Course Level: Intermediate

Skills Prerequisites: Basic Business Central navigation; understanding of inventory concepts

Typical Attendees: Inventory managers, operations users, assemblers/kitting teams, and system administrators supporting assembly processes.
