# Business Central Warehousing - Pro Training

## Course Description

This course provides a foundational overview of warehouse management in Microsoft Dynamics 365 Business Central. Attendees will explore setup considerations, inbound and outbound flows, and best practices for tracking warehouse activities. The course introduces basic and advanced warehousing structures, providing guidance on optimizing warehouse operations in Business Central.

This course is designed for accounts inventory specialists, warehouse staff, and ERP administrators who manage or oversee inventory and warehousing processes and want to optimize the inventory module in Business Central.

## Learning Objectives:

- Understand warehouse configuration and setup options in Business Central.
- Configure and manage warehouse locations, bins, and zones.
- Execute inbound processes such as receipts and put-aways.
- Perform outbound processes including picks and shipments.
- Utilize internal warehouse functions like movements and adjustments.
- Differentiate between basic and advanced warehousing setups.
- Navigate warehouse documents and journals for daily processing.
