

Power BI Pro License - Monthly Subscription

Microsoft Power BI is a suite of business analytics tools that enable organizations to analyze data and share insights. Power BI can be used to monitor the business and get answers quickly with rich dashboards available on any device.

With Power BI on the web, businesses can easily monitor important data from across the organization and from all of the apps the business relies on. It provides the tools to transform, analyze, and visualize data, and to share reports in with your organization. With SQL Server Analysis Services on-premises and Azure Analysis Services in the cloud you can easily build robust, reusable models over your data to provide consistency across reporting and analysis in your organization.

From Finance to Sales to Operations (and more), Power BI makes it easy for internal departments to unify their data and share new insights. Power BI is easy to use, and in less than five minutes you can start creating personalized dashboards and reports on your data using natural language and drag-and-drop gestures to find answers to your most important questions.
